

TNT-LB Tip'n'Tell Monitors

Product description	<p>Adhesive-backed single-use monitor that activates when the package, crate or pallet to which it has been attached has been subjected to tilt exceeding a predetermined angle.</p> <p>Each monitor will detect tilt in a single plane; if detection of sideways and forward-backward tilt is required, two monitors should be mounted on vertical planes that are at right angles to each other.</p>
Product application	<p>The Tip'n'Tell monitor is fitted with a priming pin to prevent activation prior to use. Once the monitor is firmly secured in place, this pin should be removed for the monitor to work.</p> <p>The monitor may be secured to the consignment using the adhesive backing and/or with small screws, nails or staples using the holes provided, for rough or adhesion-resistant surfaces (the backing must nevertheless be removed to prime the monitor, even if the adhesive backing is not to be used).</p> <p>Each Tip'n'Tell monitor is supplied with an adhesive companion label to warn that tilt is being monitored and to encourage correct handling.</p>
Product data	
~ construction	Rigid plastic housing, high-visibility blue indicator granules
~ adhesive	High tack pressure-sensitive acrylic
~ activation angle	80° from vertical (+/- 5%)
Packing data	
~ carton quantity	100 monitor / companion label sets
~ carton weight	2.2kg
